

**My story on how I began my life as an astrologer in Dallas, Texas**  
*Introduction from my book Secrets of Prediction*

**The Beginning**

It was November 21, 1963. I was 8 years old watching our black and white television as Jeane Dixon came on the evening news making a stark prediction. I can remember it like yesterday for it made a lasting impression. She stated clearly that if President Kennedy came to Dallas, Texas he would be assassinated.

This moved me deeply for I was born and raised in Dallas, Texas and my mother adored President Kennedy.

The next day I went to school and every classroom had televisions to watch the news while Kennedy visits Dallas. My mother had taken my two older sisters Marsha and Carol out of school to greet the President at the Dallas Love Field Airport. To this day in old video clips you can see him walk off the plane and see my mother and sisters in the crowds greeting him.

But then the unthinkable happened as the crowds followed him to downtown Dallas. This whole event was so close to home for even the Doctor who tried to save President Kennedy lived across the street on Willow Grove Rd. Dr. Malcolm Perry.

I must say my fascination for prediction began at this time for I have to believe this is very valuable information that can help us in so many ways. I began reading books on parapsychology, metaphysics, psychics and astrology.

So many skeptics constantly state that astrologers and psychics never make real predictions before they happen. They only state things after the fact. But in reality they are more concerned with disbelieving and debunking prophecy. I even read today skeptics claiming Jeane Dixon made vague predictions and she never made the Prediction about Kennedy, but I saw her myself on the news desperately making this warning hoping Kennedy would change his mind.

Skeptics have never worked with prediction and experienced the gift of astrology. It can help in so many ways; possibly it could have saved President Kennedy if he had heeded the warning from Jeane Dixon.

From my life's experiences astrology does actually work and you will see the proof.

Of course it is fair to say there are a lot of bad psychics and astrologers out there, for there are no regulations, and if there is easy money to be made all the Charlatan's and fakes come out of the woodwork. And the fakes give the true art of astrology a bad name.

Furthermore, there are many religions and beliefs that put astrology in a bad light. Nothing they are led to believe about astrology is based on facts. And unfortunately this has somehow consumed the minds of most people in America.

Miscommunications and ignorance has been passed down through the ages on astrology. It is believed that the religious leaders centuries ago didn't want the people to have power so they indicated to the masses that astrology was evil and satanic. Meanwhile the popes used astrologers and the Vatican has the largest archive of astrology books. I am here to inform you astrology has nothing to do with evil or the devil; nothing could be further than the truth. In most religious texts there are reference to the stars.

To be able to read the information in the stars gives wisdom and guidance. Scientifically this is the study of cycles. In the bible the three wise men follow a star that indicated the birth of Christ. It is a known fact that the three wise men are astrologers. They are called "Magi" which translates into "astrologer." The fact that they are called "Wise Men" insinuates they are wise for following the stars. Astrology gives wisdom, and this has been my experience.

Historically it is a well-known fact that many of the Presidents, kings, and the rich and famous used astrologers. The men who built America built Washington DC in accordance to the stars, Stonehenge and all Pyramids were

built according to the stars, Egyptian and Mayan. President Reagan and his wife Nancy used astrologer Joan Quigley. President Franklin D. Roosevelt, President Eisenhower, President Nixon all used Jeane Dixon. But I truly wished that President John F Kennedy listened to Jeane Dixon. Adolph Hitler, Winston Churchill, Einstein, Carl G. Jung, Princess Diana, and Edgar Cayce to name a few, used astrologers.

It is a well known fact that J.P. Morgan's astrologer Evangeline Adams told Morgan not to get on the Titanic, which he listened and had the utmost respect for astrology. Another quote by Morgan is "Anyone can be a millionaire, but to become a billionaire, you need an astrologer." This is based on the fact that many people use astrology that work in the stock market. A more recent quote by Donald Reagan, formerly Ronald Reagan's Chief of Staff explains, "It's common knowledge that a large percentage of Wall Street brokers use astrology."

Unbeknown to many, President Theodore Roosevelt kept his horoscope mounted on a chessboard in the oval office. When asked about it he would reply, "I always keep my weather eye on the opposition of my seventh house Moon to my first house Mars."
